

Think Outside The Box

With the introduction of a Container Deposit Scheme in 2017, document destruction companies are looking for a new product to offer customers to assist in redeeming their container deposits. A Paper to Paper 2-in-1 or 3-in-1 under desk receptacle that also replaces the unsightly cardboard box may be just the answer.

This patented and Australian made multipurpose recycling receptacle was designed to separate waste right at its source. Ideally set up to allow workers to easily separate paper and containers from their non-recyclables, it is a

useful tool for businesses to benefit from increased security and reduced landfill whilst also benefitting from container deposit redemption. The classic cardboard box is limited in both its usefulness and durability, whereas the Multi Purpose Recycling Bin does not need replacing and is priced to cover the investment within a year. It is available in many colours to complement any office and manufactured using up to 40% recycled content polypropylene.

Also consider that in NSW small to medium size businesses can apply for an individual rebate of \$1,000 to \$50,000 of the capital cost of equipment through the Bin Trim assessment program. More information is available at www.epa.nsw.gov.au/bintrim or contact the EPA on 131 555 and email Bin.Trim@epa.nsw.gov.au to arrange an eligibility assessment.

You have already seen the advantages of a secure document cabinet. Just think outside the box and support your customers into their secure recycling future. The Paper to Paper bin is now being discounted for distributors, with free trial bins available on request to large volume customers.
