

Container Deposit Scheme

The New South Wales government has announced details for the Container Deposit Scheme (CDS), which is already operating in South Australia and Northern Territory. The CDS is creating an incentive for households and businesses to tackle litter and resource recovery across the state, with the ultimate aim of reducing litter in NSW by 40% by 2020.

The historic legislation has an official start up date of July 2017. Nevertheless many communities are taking initiative with reverse vending machines already operating and offering small financial incentives.

Our simple but efficient 2 in 1 or 3 in 1 multi-purpose recycling bin is ideally suited for enabling container deposit redemption. Designed in 2002, the bins are Australian made, patented, manufactured using up to 40% recycled content polypropylene, and stackable for transport and export. It enables the easy separation of paper and containers from non-recyclables in one receptacle, whilst retaining an A4 footprint. The common two or three desk side recycling receptacles taking up valuable floor space are no longer a necessity, when the Multi-Purpose Recycling Bin does it all without leaving your work station. The bins arrive fully assembled and are available in a range of colours for the users convenience.

Further product information is available at www.recycling-bins.com.au Multi-Purpose Recycling Bins Pty Ltd is seeking additional stockists and distributors for this unique bin which will replace the many outdated single bins and cardboard boxes common in many offices and homes. Our 35 years of international recycling successes will help provide the quality and education to complement your existing product range. Please contact our office at info@recycling-bins.com.au or +61 2 9998 2333 for pricing and support.
